O.E.S. Doc.18.

Blacksburg, Virginia,

June 27, 1889.

Dear Sir:

At the recent conference of Horticulturists held at Columbus, Ohio, it was decided that inasmuch as the replies to our previous letters of inquiry were too general to afford the desired information the committee on co-operation should make further efforts to secure an outline of the special work in horticulture pursued at the different stations.

The Office of Experiment Stations has thus far very kindly conducted the correspondence relating to this matter and from the same source the following list of questions prepared by the committee is issued. Any other information bearing on the subject will be thankfully received.

We trust that the work of the committee will meet your hearty approval and that you will attend to this matter as promptly as is convenient.

Very respectfully,

Wm. B. Alwood
